EXPERIENCE

LogRocket, Remote — *Article Writer*

November 2020 - PRESENT

As a developer, I wanted to share my experience and getting the position as an article writer was a big step. I have written a couple of articles that have impacted developers helped solve a problem and detailed explanations on a topic in the role. I cover topics that range from caching (Redis for the most part), authentication, APIs creation, and effective use of different databases, and detailed how-to topics.

Codekago Interactive, Akwa Ibom State — *Lead Backend Developer*

January 2020 - PRESENT

With the position of Lead-developer came great responsibilities. I was in charge of configuring servers, structuring databases, choosing the best backend stack for a specific project, creating and implementing user stories concerning the backend and server maintenance for old projects. As Lead-developer I've seen the completion of 5 Major projects which had a large user base and were extended to mobile applications.

Codekago Interactive, Akwa Ibom State — *Backend Developer*

January 2019 - December 2019

On my return to Codekago Interactive as a Backend Developer, I joined the core team in building live applications with a user base ranging to the thousands. That gave me a sense of carefulness and security on how to go about my building applications which impacted so many lives. I saw the rebuild of most of the company's applications and the launch of postponed or abandoned ones.

Codekago Interactive, Akwa Ibom State — *Paid Intern Developer*

May 2017 - May 2018

As an intern developer at Codekago, I got the opportunity to learn a lot in regards to programming, got hands-on live projects, and worked

PROJECTS

[Protraka](#) — *Diesel tracking*

Protraka is a phenomenal web application that allows consumers to buy and keep track of their diesel consumption. It also allows for sellers to put diesel up for sale and consumers could bargain prices in real-time.

[OakExpress](#) — *Logistics services*

OakExpress is a logistic company with a quick and effective delivery service. To better render their service, a mobile application that supports both android and iOS devices were built and deployed along with a web application for better accessibility.

[ManageAm](#) — *Diabetics Tracker*

ManageAm is a mobile and web-based application that keeps track of diabetic patients gives them tips on how to stay healthy and tracks their food and calories consumption. It also recommends and tracks drug use and educates users on how to deal with diabetes.

[Password](#) — *Ecommerce*

Password is an e-commerce website with vendors, agents, and sellers in mind. With Password, a vendor can put their products up for sale, and an agent can manage the online store for the vendor while a user can shop nonstop with zero inconveniences.

[GoSprint](#) — *Transportation service*

GoSprint is a reliable and affordable transportation service that targets individual customer satisfaction through tailor-made packages that improve efficiency in the transportation industry.
